PLEASE NOTE...

We publish regular updates to the **Global Digital Reports** series.
[Click here](#) to ensure you're using our latest data for Jordan.

This page contains all the latest data, insights, and trends you need to help you understand how people in **Jordan** use digital devices and services in **2024**.

If you want to check whether this is our most up-to-date report for Jordan, or if you're looking for data on digital trends and behaviours in Jordan for previous years, you can find **DataReportal's** full collection of reports on Jordan by [clicking here](#).

You'll also find the complete **Digital 2024** report for Jordan in the "full report" section below, but we'll start by taking a look at the essential headline numbers for Jordan this year.

Just before that, we'd like to thank **We Are Social** and **Meltwater** for making the 2024 **Global Digital Reports** series possible.

OK, let's get into the data...

The state of digital in Jordan in 2024

Here are **DataReportal's** essential headlines for digital adoption and use in Jordan in early 2024:

- There were **10.33 million** internet users in Jordan at the start of 2024, when internet penetration stood at **91.0 percent**.
- Jordan was home to **6.38 million** social media users in January 2024, equating to **56.2 percent** of the total population.
- A total of **9.14 million** cellular mobile connections were active in Jordan in early 2024, with this figure equivalent to **80.4 percent** of the total population.

These headline stats offer a great overview of the "state of digital" in Jordan, but in order to make sense of how digital trends and behaviours are *evolving*, we need to dig deeper into the data.

Let's take a closer look at what the latest numbers tell us, starting with some valuable context relating to the population of Jordan.

Population of Jordan in 2024

The population of Jordan stood at **11.36 million** in January 2024.

Data shows that Jordan's population **increased** by **43 thousand** (+0.4 percent) between early 2023 and the start of 2024.

48.3 percent of Jordan's population is **female**, while **51.7 percent** of the population is **male**.

At the start of 2024, **92.1 percent** of Jordan's population lived in **urban centres**, while **7.9 percent** lived in **rural areas**.

Note: gender data are currently only available for "female" and "male".

Jordan's population by age

The median age of Jordan's population is **24.2**.

Here's how Jordan's total population breaks down by age group:

- **10.3 percent** is between the ages of **0 and 4**.
- **16.6 percent** is between the ages of **5 and 12**.
- **10.4 percent** is between the ages of **13 and 17**.
- **12.4 percent** is between the ages of **18 and 24**.
- **16.6 percent** is between the ages of **25 and 34**.

- **13.2 percent** is between the ages of **35 and 44**.
- **10.0 percent** is between the ages of **45 and 54**.
- **6.4 percent** is between the ages of **55 and 64**.
- **4.1 percent** is aged **65 and above**.

Note: percentages may not sum to 100 percent due to rounding.

ADVERTISEMENT

Internet use in Jordan in 2024

There were **10.33 million** internet users in Jordan in January 2024.

Jordan's internet penetration rate stood at **91.0 percent** of the total population at the start of 2024.

Kepios analysis indicates that internet users in Jordan **increased by 92 thousand** (+0.9 percent) between January 2023 and January 2024.

For perspective, these user figures reveal that **1.03 million** people in Jordan did **not** use the internet at the start of 2024, suggesting that **9.0 percent** of the population remained offline at the beginning of the year.

However, complexities associated with the collection and analysis of internet user data mean that it can often take several months before research is ready for publication. As a result, the latest *published* figures for internet use invariably *under-represent* reality, and actual adoption and growth may be higher than the figures shown here suggest. Please see our comprehensive [notes on data](#) for further details.

Dig deeper: for the latest insights into internet adoption and use around the world, follow our regular **Global Statshot** reports.

Go global: see how Jordan's current "state of digital" compares with connectivity in other countries by reading our flagship [Digital 2024 Global Overview Report](#), which includes hundreds of slides of global digital data, and our in-depth analysis of what these numbers might mean for you.

Internet connection speeds in Jordan in 2024

Data published by **Ookla** indicate that internet users in Jordan could have expected the following internet connection speeds at the start of 2024:

- Median **mobile** internet connection speed via cellular networks: **22.11 Mbps**.
- Median **fixed** internet connection speed: **110.49 Mbps**.

Ookla's data reveals that the median **mobile** internet connection speed in Jordan **increased by 5.51 Mbps** (+33.2 percent) in the twelve months to the start of 2024.

Meanwhile, Ookla's data shows that **fixed** internet connection speeds in Jordan **increased by 35.92 Mbps** (+48.2 percent) during the same period.

AD

DataReportal's figures show that there were **6.38 million** active social media user identities in Jordan in January 2024.

Note: over the past year, we've made some **important changes** to how we calculate social media user numbers, and the data sources that we use to inform these calculations have also made significant and wide-ranging revisions to their published figures during that period.

As a result, our latest figure for social media use might appear to be quite different to the values that we published in **previous years**.

Because of this, we advise caution when comparing the social media user values published in this year's reports with those published in previous years, especially because changes in reported values may be the result of "corrections" in the source data, as well as changes in actual user behaviour.

For clarity, **Kepios** analysis shows that social media users in Jordan **decreased by 230 thousand** (-3.5 percent) between early 2023 and the beginning of 2024.

The number of social media users in Jordan at the start of 2024 was equivalent to **56.2 percent** of the total population, but it's important to stress that social media users may **not** represent unique individuals (see our detailed [notes on data](#) to learn why).

Meanwhile, data published in the ad planning tools of top social media platforms indicates that there were **5.38 million** users aged **18 and above** using social media in Jordan at the start of 2024, which was equivalent to **75.6 percent** of the total population aged **18 and above** at that time.

More broadly, **61.7 percent** of Jordan's total internet user base (regardless of age) used at least one social media platform in January 2024.

At that time, **46.9 percent** of Jordan's social media users were **female**, while **53.1 percent** were **male**.

Note: gender data are currently only available for "female" and "male".

Get fresh insights: our handy social media [overview page](#) helps you stay up to date with global social media trends, offering

Facebook users in Jordan in 2024

Data published in Meta's advertising resources indicates that **Facebook** had **5.30 million** users in Jordan in early 2024.

However, Meta has made important changes to the way its advertising resources report audience reach data over recent months – including making significant revisions to its base audience data for Facebook – so the figures shown here may **not be directly comparable** with figures published in our previous reports.

To learn more about these changes, please see [this article](#), as well as our comprehensive [notes on data](#).

Facebook user growth in Jordan

Figures published in Meta's own tools indicate that Facebook's potential ad reach in Jordan **increased** by **400 thousand** (+8.2 percent) between January 2023 and January 2024.

For more recent context, the same data show that the number of users that marketers could reach with ads on Facebook in Jordan **decreased** by **250 thousand** (-4.5 percent) between October 2023 and January 2024.

However, it's important to stress that these advertising reach figures are **not** the same as the monthly active users figures that Meta reports in its investor earnings announcements, and they should not be interpreted as such.

As the company states within its ad planning tools,

"Estimated audience size is not a proxy for monthly or daily active users, or for engagement. Estimates aren't designed to match population, census estimates or other sources, and may differ depending on factors such as how many accounts across Meta technologies a person has, how many temporary visitors are in a particular geographic location at a given time, and Meta user-reported demographics."

As a result, changes in ad reach may not necessarily indicate any change in the platform's overall user base.

But despite these caveats, Meta's ad reach data still offers valuable insights into how Facebook use is evolving.

Facebook adoption in Jordan

Facebook's ad reach in Jordan was equivalent to **46.7 percent** of the total population at the start of 2024.

However, Meta only allows people aged 13 and above to use Facebook, so it's worth highlighting that **63.9 percent** of the "eligible" audience in Jordan uses Meta in 2024.

For additional context, Facebook's ad reach in Jordan was equivalent to **51.3 percent** of the local internet user base (regardless of age) in January 2024.

At the start of 2024, **43.8 percent** of Facebook's ad audience in Jordan was **female**, while **56.2 percent** was **male**.

Note: Meta's advertising resources only publish audience gender data for "female" and "male" users.

ADVERTISEMENT

AD

Google's advertising resources indicate that **YouTube** had **6.38 million** users in Jordan in early 2024.

It's important to stress that these advertising reach figures do **not** necessarily represent the same thing as monthly active user figures though, and there may be meaningful differences between the size of YouTube's ad audience and its total active user base.

However, the company's own data suggests that YouTube's *ad reach* in early 2024 was equivalent to **56.2 percent** of Jordan's total population at the start of the year.

To put those figures in perspective, YouTube ads reached **61.7 percent** of Jordan's total internet user base (regardless of age) in January 2024.

At that time, **48.5 percent** of YouTube's ad audience in Jordan was **female**, while **51.5 percent** was **male**.

Note: Google's advertising resources only publish audience gender data for "female" and "male" users.

YouTube user growth in Jordan

Data published in Google's own ad planning tools show that YouTube's potential ad reach in Jordan **decreased** by **230 thousand** (-3.5 percent) between the start of 2023 and early 2024.

Meanwhile, the same data show that the number of users that marketers could reach with ads on YouTube in Jordan **remained unchanged** between October 2023 and January 2024.

Need more social media numbers? Our [platform guides](#) help you make sense of all the latest stats for the world's biggest social media platforms.

Instagram users in Jordan in 2024

Numbers published in Meta's advertising tools indicate that **Instagram** had **3.70 million** users in Jordan in early 2024.

The company's regularly **revised** figures suggest that Instagram's ad reach in Jordan was equivalent to **32.6 percent** of the total population at the start of the year.

However, Meta only allows people aged 13 and above to use Instagram, so it's worth highlighting that **44.6 percent** of the "eligible" audience in Jordan uses Instagram in 2024.

It's also worth noting that Instagram's ad reach in Jordan at the start of 2024 was equivalent to **35.8 percent** of the local internet user base (regardless of age).

In early 2024, **50.0 percent** of Instagram's ad audience in Jordan was **female**, while **50.0 percent** was **male**.

Note: Meta's advertising resources only publish audience gender data for "female" and "male" users.

Instagram user growth in Jordan

Data published in Meta's planning tools show that Instagram's potential ad reach in Jordan **increased by 850 thousand** (+29.8 percent) between January 2023 and January 2024.

On a quarterly basis, the company's data also reveal that the size of Instagram's ad audience in Jordan **decreased by 100 thousand** (-2.6 percent) between October 2023 and January 2024.

As we noted in the Facebook section above though, changes in the audience reach figures published in Meta's ad planning tools **do not** necessarily correlate with overall changes in its platforms' active user bases.

► Looking for more **Instagram** stats? [Click here](#) to explore our in-depth Instagram data for every country in the world.

TikTok users in Jordan in 2024

Figures published in ByteDance's advertising resources indicate that **TikTok** had **2.67 million** users aged 18 and above in Jordan in early 2024.

Note that ByteDance allows marketers to target TikTok ads to users aged 13 and above via its advertising tools, but these tools only show audience data for users aged 18 and above.

For context, ByteDance's figures indicate that TikTok ads reached **37.5 percent** of all adults aged 18 and above in Jordan at the start of 2024.

Meanwhile, TikTok's ad reach in Jordan was equivalent to **25.9 percent** of the local internet user base at the beginning of the year, regardless of age.

In early 2024, **43.1 percent** of TikTok's ad audience in Jordan was **female**, while **56.9 percent** was **male**.

Note: ByteDance's advertising resources only publish audience gender data for "female" and "male" users.

TikTok user growth in Jordan

Data published in ByteDance's own ad planning tools show that TikTok's potential ad reach in Jordan **decreased by 1.8 million** (-39.6 percent) between the start of 2023 and early 2024.

t percent) between

Having said that, ad audiences often only account for a subset of a platform's total users, and given that TikTok's ad tools only publish data for users aged 18 and above, it's important to remember that trends in TikTok's ad reach figures may not necessarily match changes in the platform's overall user base.

► Looking for more **TikTok** stats? [Click here](#) to explore our in-depth TikTok data for every country in the world.

Facebook Messenger users in Jordan in 2024

Data published in Meta's advertising resources indicate that ads on **Facebook Messenger** reached **3.90 million** users in Jordan in early 2024.

The company's frequently **revised** audience numbers suggest that Facebook Messenger's ad reach in Jordan was equivalent to **34.3 percent** of the total population at the start of the year.

Meta only allows people aged 13 and above to use Facebook Messenger though, so it's worth highlighting that **47.0 percent** of Facebook Messenger's "eligible" audience in Jordan in 2024.

For additional context, Facebook Messenger's ad reach in Jordan is equivalent to **37.7 percent** of the local internet user base (regardless of age).

At the start of 2024, **43.6 percent** of Facebook Messenger's ad audience in Jordan was **female**, while **56.4 percent** was **male**.

Notes: Meta's advertising resources only publish audience gender data for "female" and "male" users.

Facebook Messenger user growth in Jordan

Data published in Meta’s planning tools show that Facebook Messenger’s potential ad reach in Jordan **increased by 550 thousand** (+16.4 percent) between January 2023 and January 2024.

On a quarterly basis, the company’s data reveal that the size of Facebook Messenger’s ad audience in Jordan **decreased by 250 thousand** (-6.0 percent) between October 2023 and January 2024.

However, as we noted in the Facebook section above, changes in the audience reach figures published in Meta’s ad planning tools **do not** necessarily correlate with overall changes in its platforms’ active user bases.

► Looking for more **Facebook Messenger** stats? [Click here](#) to explore our in-depth Facebook Messenger data for every country in the world.

LinkedIn users in Jordan in 2024

Figures published in LinkedIn’s advertising resources indicate that **LinkedIn** had **1.60 million** “members” in Jordan in early 2024.

However, note that LinkedIn’s advertising tools publish audience reach data based on *total registered members*, rather than the *monthly active users* that form the basis of the ad reach figures published by most other social media platforms.

As a result, these LinkedIn figures are not directly comparable with the figures for other social media platforms published on this page, or in our [Digital 2024](#) reports.

The company’s advertising reach figures suggest that LinkedIn’s audience in Jordan was equivalent to **14.1 percent** of the total population at the start of 2024.

LinkedIn prevents people below the age of 18 from using its platform though, so it’s also helpful to know that **22.5 percent** of the “eligible” audience in Jordan uses LinkedIn in 2024.

For additional context, LinkedIn’s ad reach in Jordan was equivalent to **15.5 percent** of the local internet user base (regardless of age) at the start of the year.

In early 2024, **32.6 percent** of LinkedIn’s ad audience in Jordan was **female**, while **67.4 percent** was **male**.

Note: LinkedIn’s advertising resources only publish audience gender data for “female” and “male” users.

LinkedIn user growth in Jordan

Data published in LinkedIn’s planning tools show that LinkedIn’s potential ad reach in Jordan **increased by 200 thousand** (+14.3 percent) between the start of 2023 and the beginning of 2024.

On a quarterly basis, the company’s data reveal that the size of LinkedIn’s ad audience in Jordan **remained unchanged** between October 2023 and January 2024.

However, because LinkedIn’s ad audience figures are based on *total registered members* rather than monthly active users, it’s unclear whether these trends might reflect changes in active LinkedIn use too.

Snapchat users in Jordan in 2024

However, Snap only allows people aged 13 and above to use the platform, so it’s also worth noting that **41.7 percent** of the “eligible” audience in Jordan uses Snap in 2024.

For additional context, Snapchat’s ad reach in Jordan was equivalent to **33.5 percent** of the local internet user base (regardless of age) at the start of the year.

In early 2024, **54.3 percent** of Snapchat’s ad audience in Jordan was **female**, while **44.4 percent** was **male**.

Note: Snap’s advertising resources only publish audience gender data for “female” and “male” users, but the figures published for these demographics don’t always add up to the total user figure, so percentages shown here may not sum to 100 percent.

Snapchat user growth in Jordan

Data published in Snap’s own ad planning tools show that Snapchat’s potential ad reach in Jordan **increased by 210 thousand** (+6.5 percent) between the start of 2023 and early 2024.

Meanwhile, the same data show that the number of users that marketers could reach with ads on Snapchat in Jordan **decreased by 35 thousand** (-1.0 percent) between October 2023 and January 2024.

However, it’s important to stress that these advertising reach figures do **not** represent monthly active user figures, and there may be meaningful differences between the size of Snapchat’s ad audience and its total active user base.

► Looking for more **Snapchat** stats? [Click here](#) to explore our in-depth Snapchat data for every country in the world.

X users in Jordan in 2024

Numbers published in X (Twitter)'s advertising resources indicate that **X** had **1.09 million** users in Jordan in early 2024.

This figure means that X's ad reach in Jordan was equivalent to **9.6 percent** of the total population at the time.

However, it's important to stress that these advertising reach figures are **not** the same as monthly active user figures, and there may be meaningful differences between the size of X's ad audience and its total active user base.

Moreover, we've seen some particularly bizarre trends in the data reported in X's advertising tools over the past year, so we'd advise caution when it comes to analysing these X figures.

It's worth noting that X only allows people aged 13 and above to use its platform, so the latest figures suggest that **13.2 percent** of the "eligible" audience in Jordan uses X in 2024.

For additional context, X's ad reach in Jordan was equivalent to **10.6 percent** of the local internet user base (regardless of age) at the start of the year.

In early 2024, the company's own data indicated that **36.6 percent** of X's ad audience in Jordan was **female**, while **63.4 percent** was **male**.

However, it's worth noting that X *infers* its users' gender, by analysing signals such as the name that users enter in their profile, and their broader activity on the platform.

This contrasts with the gender data offered in the advertising tools of platforms like Facebook, which relies on the gender that users themselves enter in their own profile.

Moreover, our analysis suggests that X's inferences may not be particularly reliable in determining users' gender, especially in countries where English is not the dominant language.

For example, consumer research findings published by **GWJ** often offer quite a different picture of X use by gender compared with X's own audience data.

But the apparent distortions that frequently appear in X's inferred gender data may be due in large part to the high number of "non-human" accounts that feature in X's active user data (e.g. accounts that represent businesses, animals, musicians, etc.), especially because X doesn't currently separate these accounts out from "real" human individuals in the ways that Facebook and Instagram do.

Regardless of the cause of these anomalies though, we advise caution when analysing or interpreting X's reported figures for use by gender.

X user growth in Jordan

Data published in X (Twitter)'s own ad planning tools show that X's potential ad reach in Jordan **increased** by **172 thousand** (+18.6 percent) between the start of 2023 and early 2024.

Meanwhile, the same data show that the number of users that marketers could reach with ads on X in Jordan **decreased** by **606 thousand** (-35.7 percent) between October 2023 and January 2024.

However, please note that the figures published in X's planning tools appear to be liable to significant fluctuation – even over short periods of time – and these anomalies may impact the reliability and representativeness of this change data.

Mobile connections in Jordan in 2024

Data from **GSMA Intelligence** shows that there were **9.14 million** cellular mobile connections in Jordan at the start of 2024.

However, note that many people around the world make use of more than one mobile connection – for example, they might have one connection for personal use, and another one for work – so it's not unusual for mobile connection figures to significantly exceed figures for total population.

GSMA Intelligence's numbers indicate that mobile connections in Jordan were equivalent to **80.4 percent** of the total population in January 2024.

The number of mobile connections in Jordan **increased** by **407 thousand** (+4.7 percent) between the start of 2023 and the start of 2024.
